NEW CENTRAL URBAN MEDIASPACE ARCHITECTURE

Ankomstrummet/niveau 0:

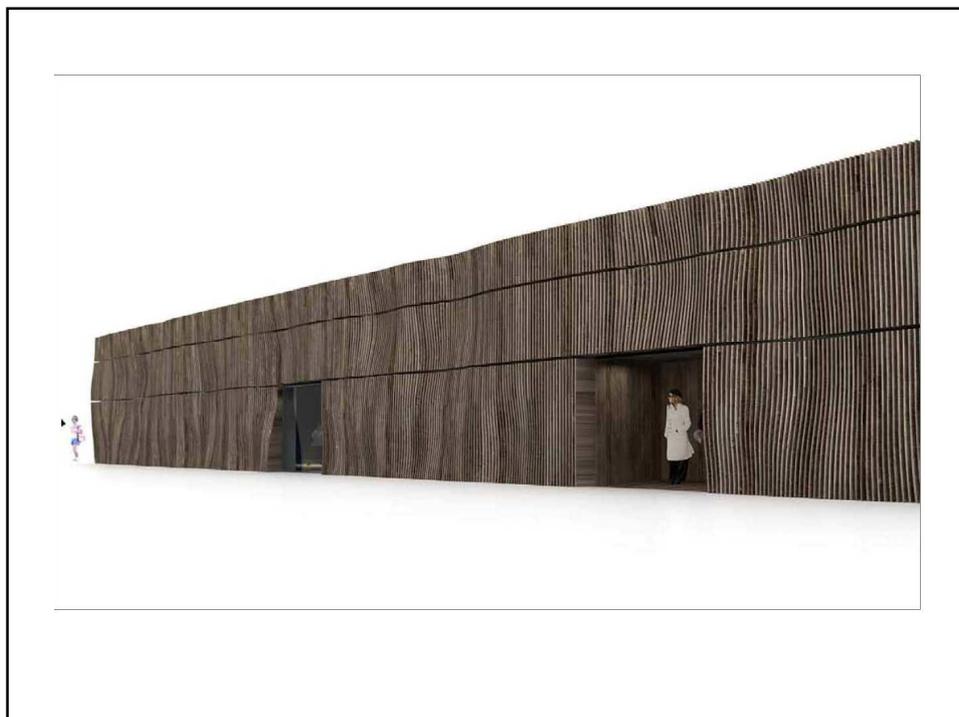

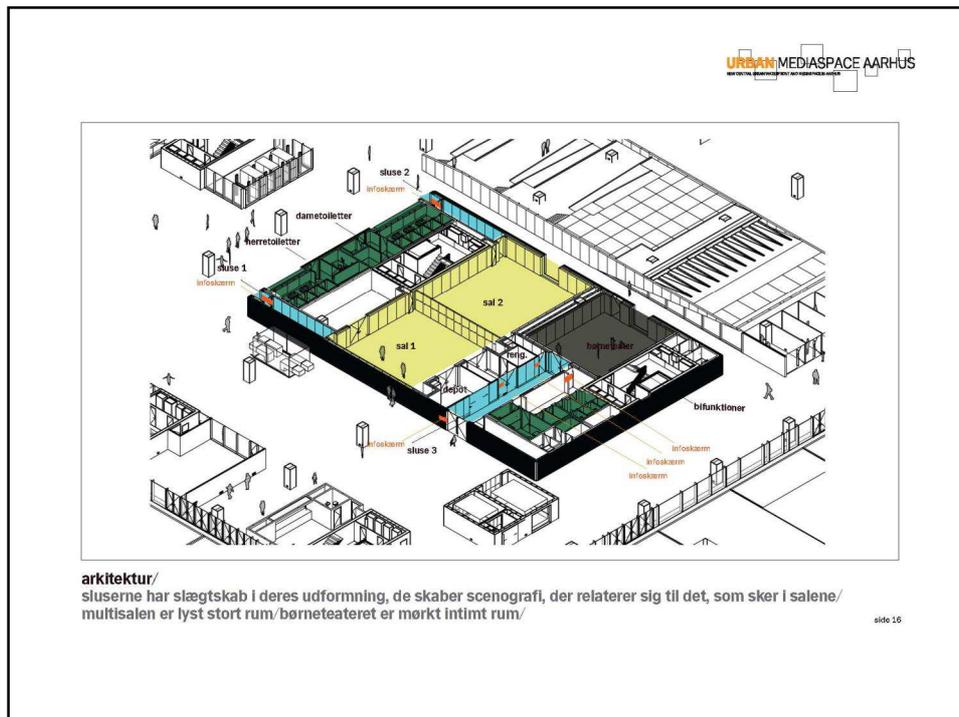

Ankomstrummet skal have meget stor synlighed - det sted på niveau 0 man primært vil orientere sig iht.

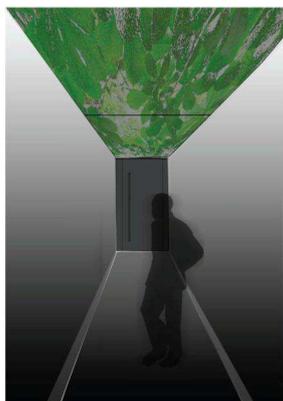

Almenbelysningen suppleres med smaltstrålede downlight i et fortættet grid i loftet, suppleret med downlight foran elevatorer for accentuering af bevægelsen.

Lys i info, tavler og p-automat og kememes øvrige sider belyses med wallwashers.

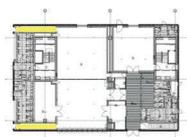

Lys i den centrale opstigning og rulletrappen (RGB-LED) farvesættes og styres som en samlet komposition

Sums up into:

Rethinking the library – how far do we go?

From: Oh, but it's just a library?

- When vision meets reality – do we dare go all the way?
- What elements from the classical library must we carry forward without alienating the classical library users?
- What is the long tail and short tail in the library?

To: Oh – THIS is a library!

- Is it possible to rethink a library and how far should we go?
- Having created a flexible building – how do we apply flavour and significance to the spaces
- How far can we broaden the library concept and still address classical library users?
