Henrik Jochumsen

Royal School of Library and information Science

Libraries and urban development

***We are not building a library for
the city. We are building the city.***

Libraries and urban development Challenges

To do that the library has to:

- Think of itself not as an independent actor but as an active and vibrant part of the city and its development.
- Collaborate with cultural and urban planners to strengthen qualities of the city.
- Think less in "library" and more in processes and synergi.

*Biblioteket i
byudviklingen*
– *oplevelse, kreativitet
og innovation*

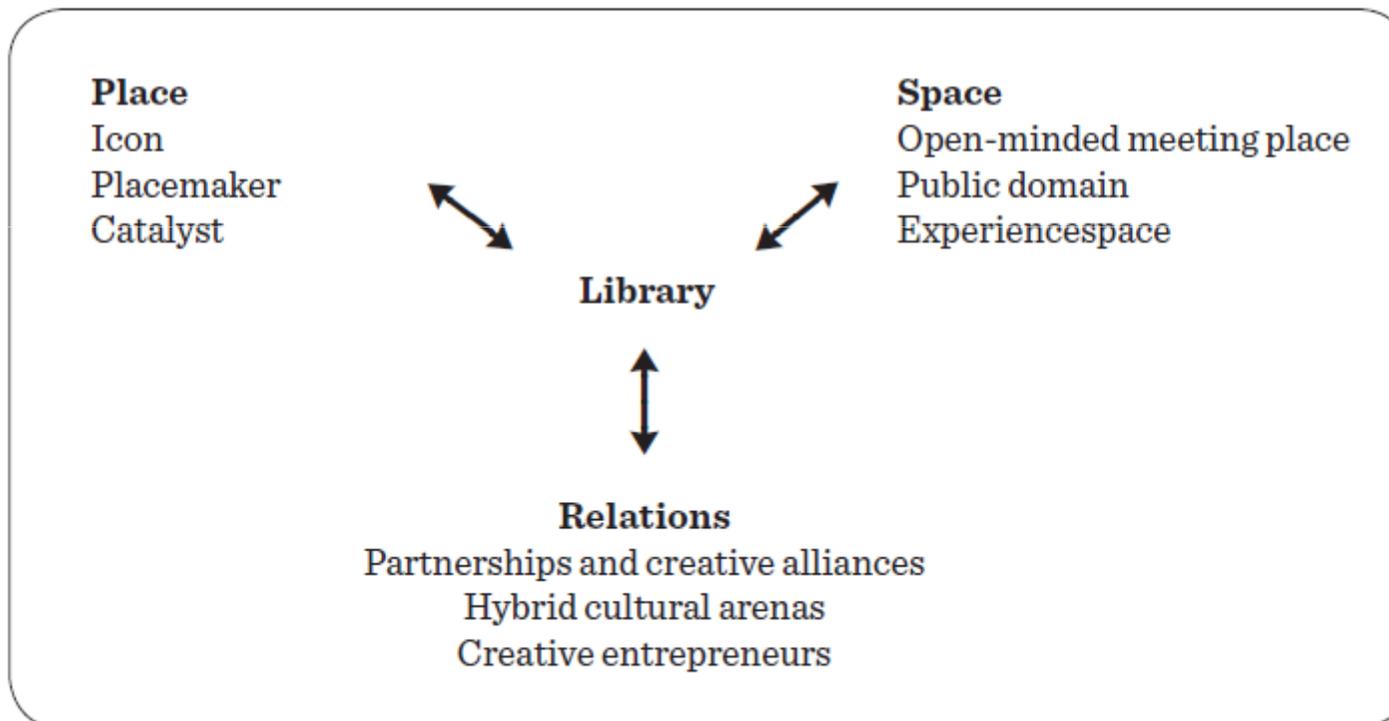

Libraries and urban development research-questions

- How can the library contribute to the city's and urban district's image, attractiveness and identity as part of a strategic urban development?
- How can the library as an urban space support citizens in need of public meeting-places and experiences?
- How can the library contribute to the development of the city's creativity and innovation through new relationships?

Libraries and urban development

Model of the public library in urban development

Libraries and urban development

Agenda

1. Short overall introduction to the connection between libraries and urban development
2. Some reflections on how libraries can be used as a strategic tool in urban development
3. Some reflection on how libraries can be inspired by urban planning.

Libraries and urban development

Context

Libraries are today facing major challenges

- Explosive developments in technology and media
- The library between the virtual and physical
- The library in competition
- New users
- Cuts and savings
- Uncertainty about the future role of the library

Process of transition

Libraries and urban development

Context

Cities are today facing major challenges

- The global competition
- Transition from industrial to postindustrial knowledge cities
- Cities have to stimulate creativity, innovation and cohesion
- And attract and retain businesses, tax-payers and tourists
- And think in terms of visibility, branding and staging

Process of transition

Libraries and urban development

Context

- Cultural institutions are today seen as major factors in urban development
 - ➔ Bilbao-effect
- New focus on the importance of the library
 - ➔ The renaissance of the physical library

The library as an icon

Libraries and urban development

The library as an icon

The icon is

- Different and unique
 - Famous (or at least intended to be)
 - Of symbolic/aesthetic quality
- By appearing as an icon the library can be an important part of urban branding and underpin the credibility of the city to investors and visitors

Iconic for whom?

The library as a placemaker

Libraries and urban development

The library as a placemaker

The placemaker is

- An active part of urban planning
- Contributing to urban diversity
- Creating "public domain" and new stages for experience
- By being a placemaker the library can establish new attractive city spaces or revitalize former industrial districts etc.

Are they contributing to everyday life and livability for the local inhabitants or are they excluding the former residents?

The library as a catalyst

Libraries and urban development

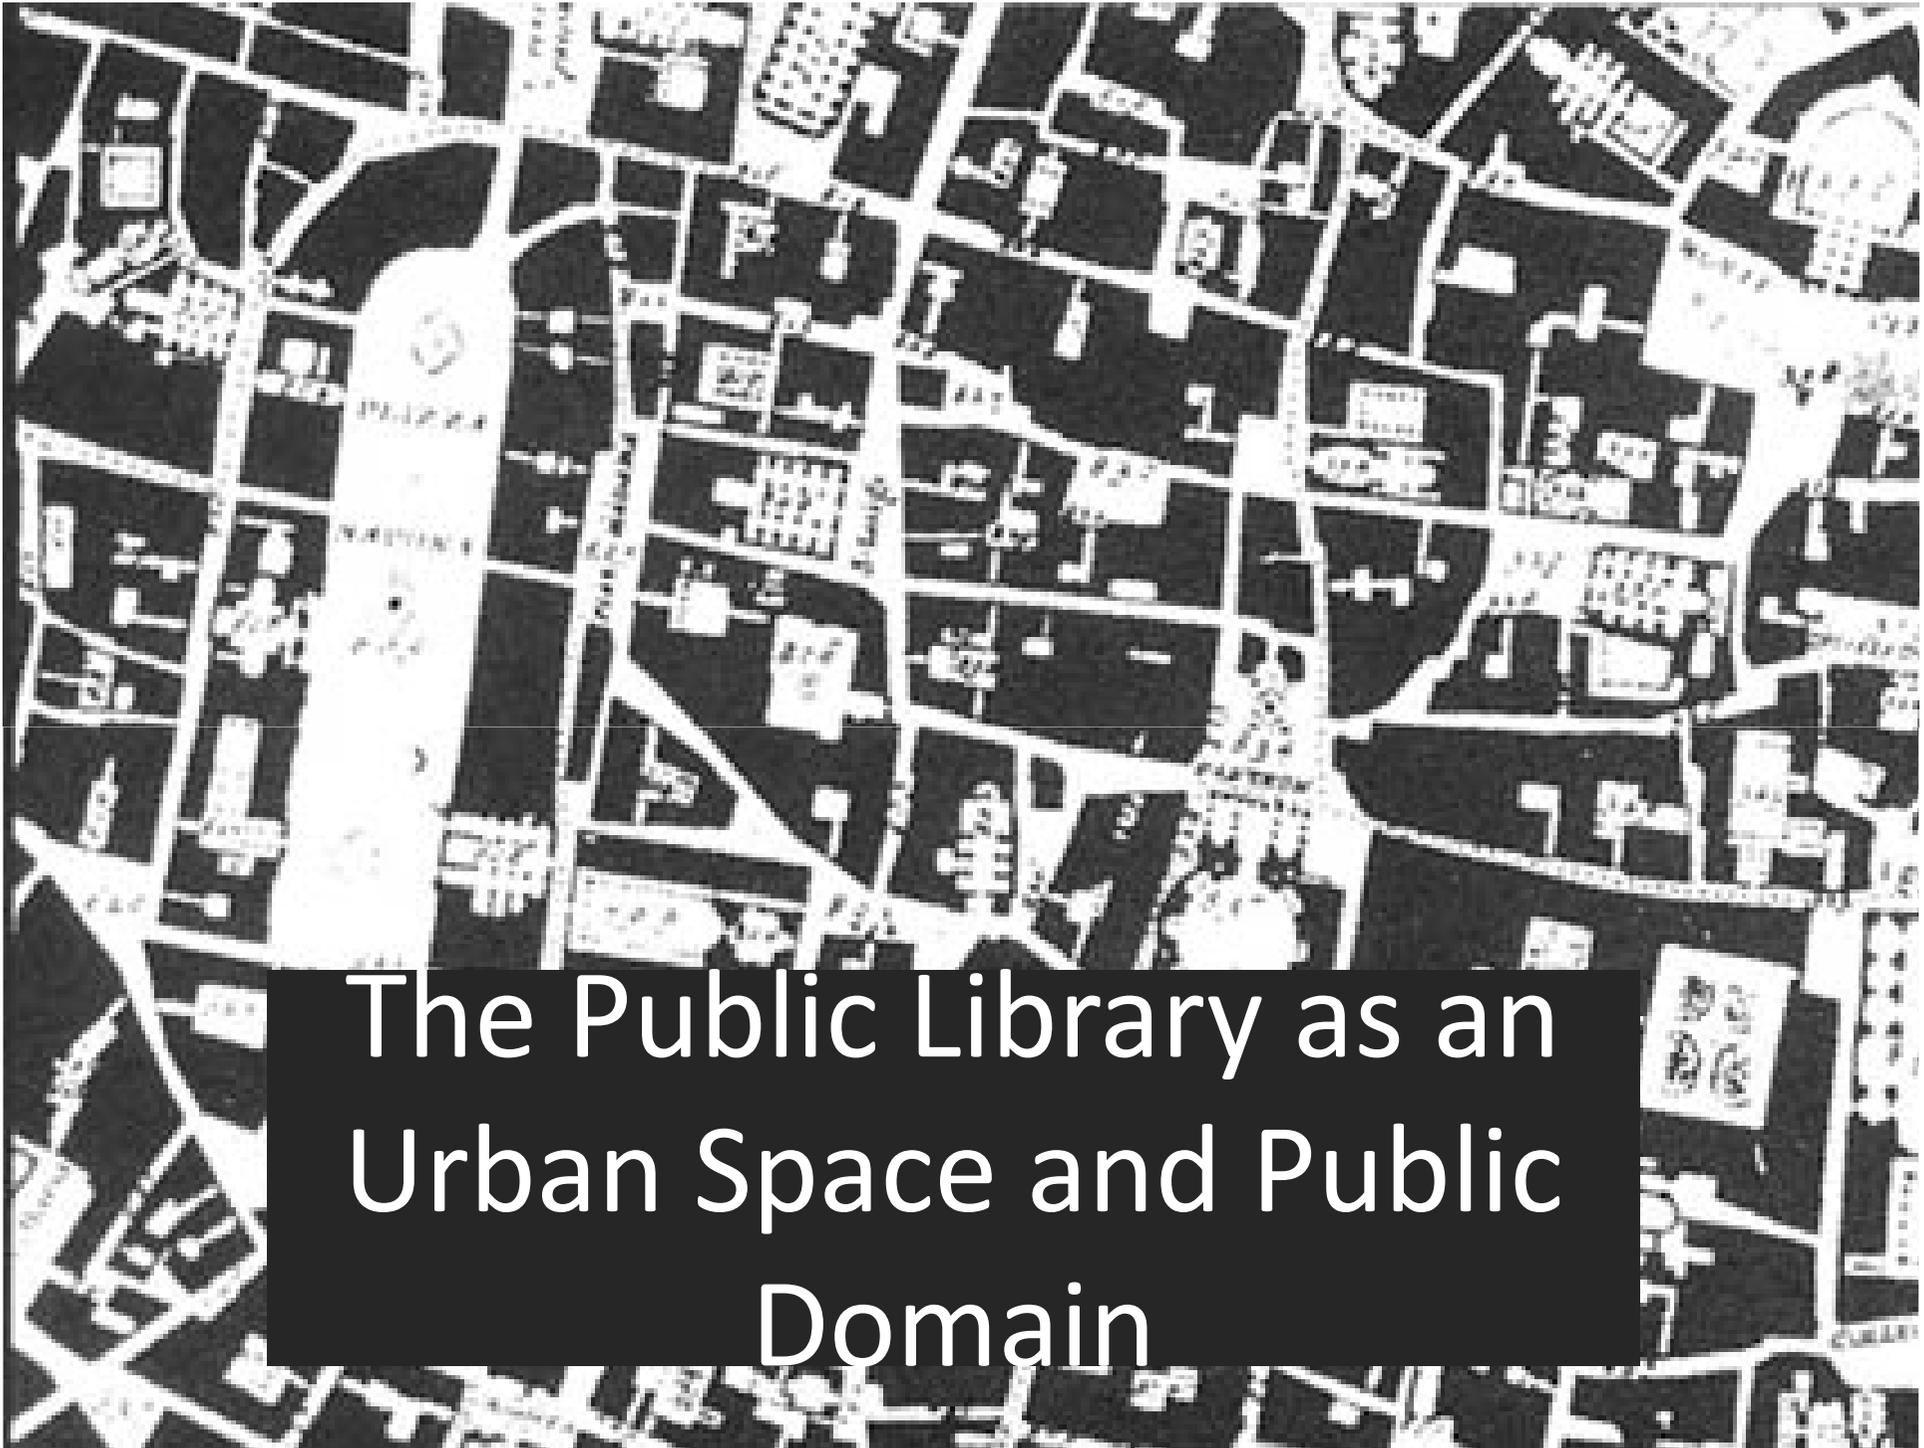

The library as a catalyst

The catalyst is

- Boosting local identity and cohesion
- Addressing social and economic challenges
- Initiating local innovation and co-operation

- By being a catalyst the library plays an important part in the development of socially and economically challenged neighbourhoods

To what extent can the library re-conceptualize its activities without moving away from being a library?

The Public Library as an
Urban Space and Public
Domain

Agenda:

- How can the design of libraries be inspired of urban planning:
- How to attract people?
- How to support exchange between different social groups?

Jan Gehl:
Vibrant urban
spaces

Arnold Reijndrop:
Public domain

The metropol as slum: Jacob Riis

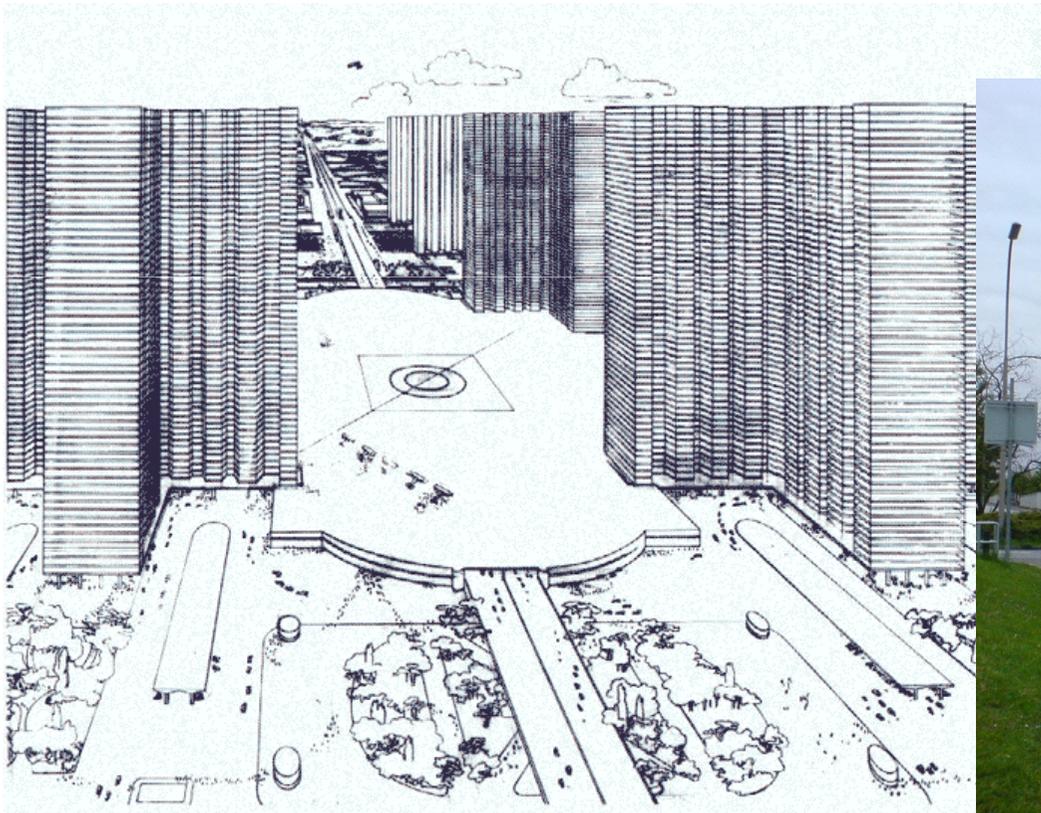

Bandits roost, 1888

Sabbath in the coal cellar, 1890

The modern functionally divided city

Le Corbusier, Radiant City,
1935

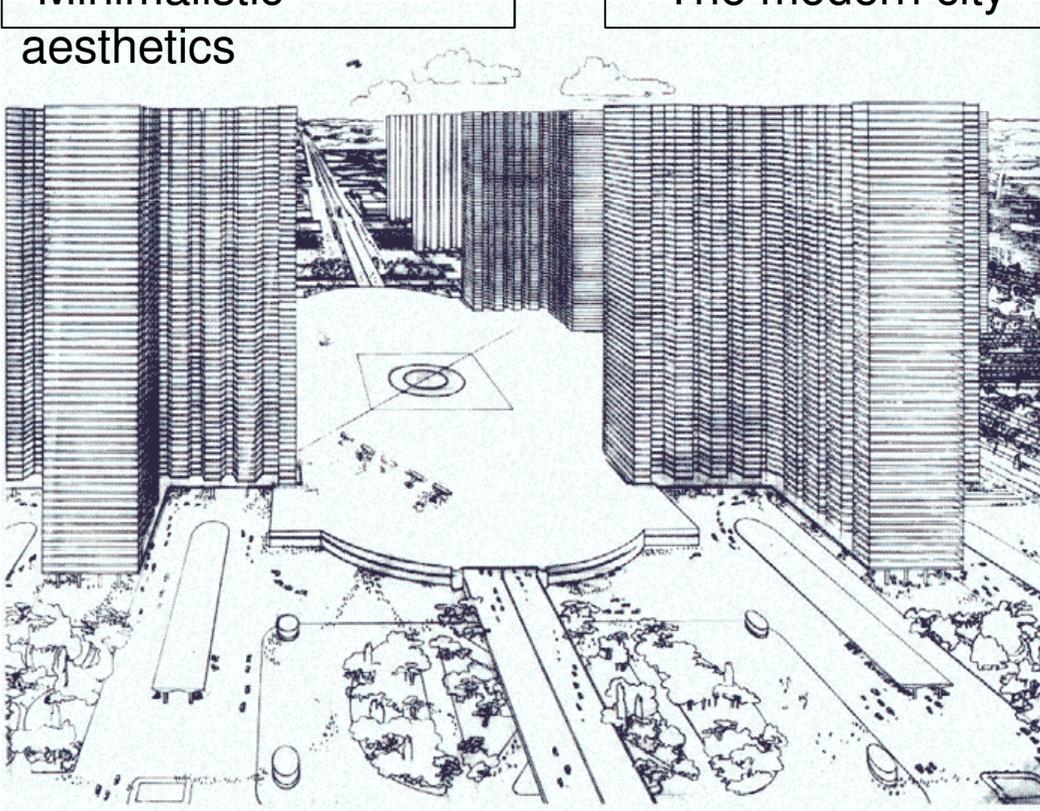

Høje Gladsaxe 1966

Modernity spaces: City and library

Focus on:

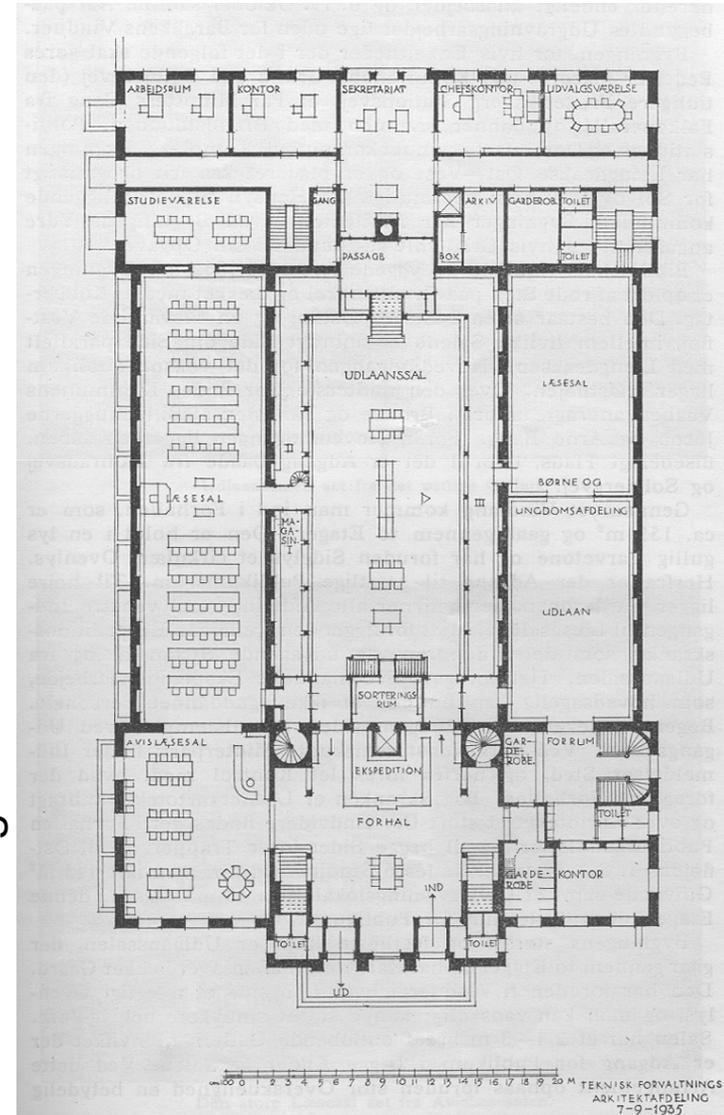

- Rationality
- Planning
- Minimalistic aesthetics

Grid-structure +
functionally
division
= The modern city

Le Corbusier, Radiant City,
1935

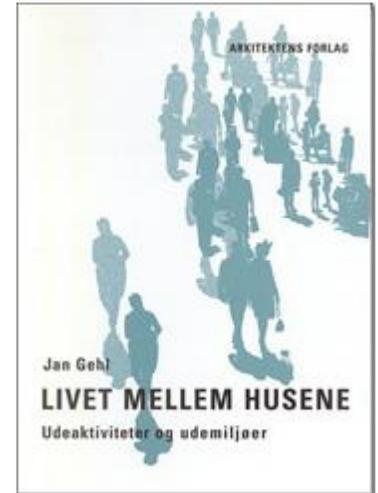

Frederiksberg Hovedbibliotek 1935

Jan Gehl: Life between the buildings

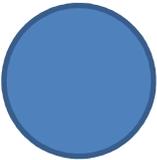

Quality of the urban space

	Bad quality	Good quality
Necessary activities		
Optional activities		
Social activities		

Gehl's model and the library

Quality of the urban space

	Bad quality	Good quality	The physical library
Necessary activities			The classic library focusing on storage and lending
Optional activities			The library as: <ul style="list-style-type: none">- Inspiration- Participation- And a place to stay
Social activities			The library as a meetingplace <ul style="list-style-type: none">- The 3rd place- Public Domain- Low intensive meeting

Challenge for the library:

To create spaces that supports all kinds of activities

Vibrant urban spaces: Basic rules

- Blur the functionally division
- Scale and ground design
- People – and not architecture – are the main attraction
- Many and different possibilities for seating

The ideal city: The medieval city
Here the old city in Stockholm

Openbare Bibliotheek Amsterdam OBA

- Different kinds of seating
- People as an attraction

Basic rules for seating:

- Cover my back
- Something to look at (especially other people)
- Different zones

The Library as Public Domain

Background for Public Domain:
The development of urban social geography

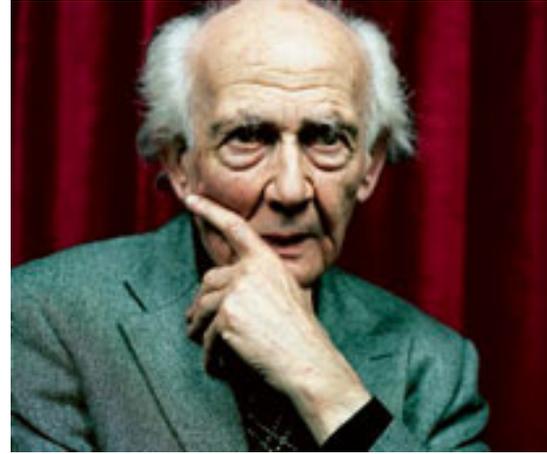

The researchers became worried

Richard Sennett:
Fall of public
man

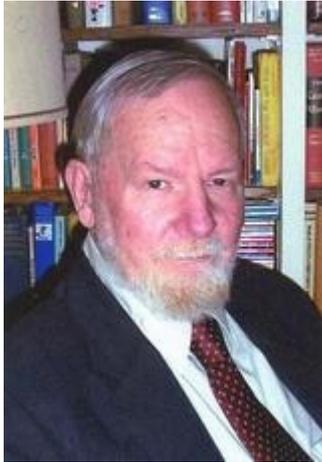

Richard Sennett, Amsterdam, 2003

Zugmunt Bauman:
Liquid modernity

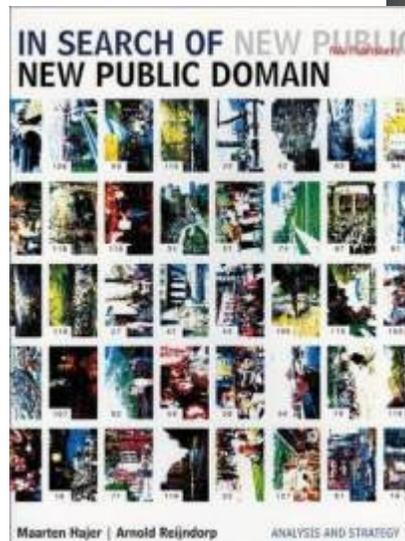

Ray Oldenburg:
The great good place

Robert Putnam:
Bowling alone

But we can do something!

- Blur borders every time you can
- Create the unexpected
- Connect different social areas of the city
- Blur the functionally division
- Focus on exchange – and not meetings

The library as public domain - 3 strategies

- Locating the library on the social borderlines in the city
- Make a transzone (urban space) between the library and the city
- A mixed and multifunctional library space

Summing up: Public libraries and

The library as a **place**

How can libraries be used in urban planning as a strategic tool?

- As an icon
- As a placemaker
- As a catalyst

Henrik Jochumsen: hjo@iva.dk

urban development

The library as a space

How can libraries be inspired by urban planning?

- How to attract people to the library
- How can libraries support exchange between different social groups

Casper H. Rasmussen: chr@iva.dk
